

# KINDNESS

---

We endeavor to cause the least amount of harm possible, by sourcing as local as possible, using plant-based ingredients, and minimising wastage.

Our aim is for you to have an amazing experience at Bonobo; one that fills up your cup and puts a big smile on your face, so you can spread that ripple of kindness into the world.

# THE BONOBO

---

One of our closest relatives, the bonobo is extremely social, kind, empathetic and cooperative. They live in troops run by females, and engage in regular, casual intimate contact between all members.

Although some of this contact is clearly just for fun, much of it is a social skill used to avoid conflict, reassure one another, and build bonds.

The result is a society with very little violence, and where lethal aggression is virtually unheard of. A society we aspire to create.
